Subject: Thank you for your gift!

[CLEAR SCIENCE](#) | [REDUCE YOUR RISK](#) | [BIG-PICTURE SOLUTIONS](#) | [DONATE](#)
Help us expose and eliminate the environmental causes of breast cancer.
Together we can stop this disease before it starts.

Dear Peter,

On behalf of the Breast Cancer Fund, I would like to thank you for your gift of \$300.00 on 9/8/15.

Donations like yours fuel our groundbreaking work to stop breast cancer before it starts by eliminating the environmental links to the disease.

One in 8 women today will be diagnosed with breast cancer. Yet only half of these cases can be tied to traditional risk factors like genetic inheritance, diet and reproductive history. More and more scientific evidence is linking breast cancer to the chemicals in our everyday environment—chemicals in our food, our products, our air and our water.

At the Breast Cancer Fund, our job is to turn that [science](#) into solutions that reduce the risk for future generations. We educate people about [safer choices](#), [advocate](#) for public policy that protects us all, and encourage companies to make safe products.

We couldn't do this work without you. Thank you again for your generosity and support.

Yours very truly,

Jeanne Rizzo, R.N.
President and CEO
Breast Cancer Fund
